

## Product datasheet

info@arigobio.com

# ARG43749 anti-MPO / Myeloperoxidase antibody [rMPO/6904]

Package: 50 μg Store at: -20°C

### **Summary**

Product Description Recombinant Mouse Monoclonal antibody [rMPO/6904] recognizes MPO / Myeloperoxidase

Tested Reactivity Hu

Tested Application IHC-P, WB

Host Mouse

Clonality Monoclonal
Clone rMPO/6904

Isotype IgG1

Target Name MPO / Myeloperoxidase

Species Human

Immunogen Synthetic peptide within aa. 150-250 of Human MPO / Myeloperoxidase.

Conjugation Un-conjugated

Alternate Names MPO; Myeloperoxidase; EC 1.11.2.2

### **Application Instructions**

Application table	Application	Dilution
	IHC-P	1 - 2 μg/ml
	WB	1 - 5 μg/ml
Application Note	IHC-P: Antigen Retrieval: Heat mediation was performed in boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	
Positive Control	Human spleen; bone marrow	
Observed Size	84 kDa	

### **Properties**

Form Liquid

Purification Purification with Protein A/G affinity.

Buffer PBS, 0.05% Sodium azide and 0.1 mg/ml BSA.

Preservative 0.05% Sodium azide
Stabilizer 0.1 mg/ml BSA

Concentration 0.2 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

### Bioinformation

Gene Symbol MPO

Gene Full Name myeloperoxidase

Background Myeloperoxidase (MPO) is a heme protein synthesized during myeloid differentiation that constitutes

the major component of neutrophil azurophilic granules. Produced as a single chain precursor, myeloperoxidase is subsequently cleaved into a light and heavy chain. The mature myeloperoxidase is a tetramer composed of 2 light chains and 2 heavy chains. This enzyme produces hypohalous acids

central to the microbicidal activity of neutrophils. [provided by RefSeq, Nov 2014]

Function Myeloperoxidase (MPO): Part of the host defense system of polymorphonuclear leukocytes. It is

responsible for microbicidal activity against a wide range of organisms. In the stimulated PMN, MPO catalyzes the production of hypohalous acids, primarily hypochlorous acid in physiologic situations, and

other toxic intermediates that greatly enhance PMN microbicidal activity. [UniProt]

Immunohistochemistry: Formalin-fixed and paraffin-embedded Human bone marrow. Antigen Retrieval: Boil tissue section in 10 mM Tris with 1 mM EDTA (pH 9.0) for 20 min, followed by cooling at RT. The tissue section was stained with ARG43749 anti-MPO / Myeloperoxidase antibody [rMPO/6904].
