ARG65446 Package: 100 µg anti-gamma Tubulin complex component 2 antibody [GCP2-01] Store at: -20°C

### **Summary**

Product Description Mouse Monoclonal antibody [GCP2-01] recognizes gamma Tubulin complex component 2

Tested Reactivity Hu, Ms, Rat, Pig

Tested Application ICC/IF, IP, WB

Specificity The clone GCP2-01 recognizes gamma-Tubulin complex component 2 (GCP2), a 95-103 kDa protein. It

also recognizes phosphorylated GCP2.

Host Mouse

Clonality Monoclonal
Clone GCP2-01
Isotype IgG2b

Target Name gamma Tubulin complex component 2

Species Mouse

Immunogen GST-fusion protein containing amino acids 2-194 of mouse GCP2

Conjugation Un-conjugated

Alternate Names GCP2; Grip103; h103p; hGrip103; GCP-2; hGCP2; hSpc97; SPBC97; Gamma-ring complex protein 103

kDa; Gamma-tubulin complex component 2; Spc97p; Spindle pole body protein Spc97 homolog

## **Application Instructions**

Application table	Application	Dilution
	ICC/IF	Assay-dependent
	IP	Assay-dependent
	WB	Assay-dependent
Application Note	WB: Used with reducing conditions.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

#### **Properties**

Form Liquid

Purification Purified from cell culture supernatant by protein-A affinity chromatography.

Purity > 95% (by SDS-PAGE)

Buffer PBS (pH 7.4) and 15 mM Sodium azide

Preservative 15 mM Sodium azide

Concentration 1 mg/ml

Storage instruction For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot

and store at -20°C or below. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed

before use.

Note For laboratory research only, not for drug, diagnostic or other use.

## Bioinformation

Database links GeneID: 10844 Human

GeneID: 74237 Mouse

Swiss-port # Q921G8 Mouse

Swiss-port # Q9BSJ2 Human

Gene Symbol Tubgcp2

Gene Full Name tubulin, gamma complex associated protein 2

Background gamma Tubulin complex component 2 (GCP2) is 95-103 kDa protein which associates with two

molecules of gamma Tubulin and one molecule of gamma Tubulin complex component 3 (GCP3), to form the gamma Tubulin small complexes (gammaTuSCs). These complexes interact with GCP4, 5, and 6 to form the gamma Tubulin ring complexes (gammaTuRCs), which are embedded in the microtubule organizing center matrix where they nucleate microtubules. The gammaTuRCs are also involved in the regulation of microtubule plus and minus end dynamics. Components of gamma Tubulin complexes are

highly conservative in eukaryotes.

Function Gamma-tubulin complex is necessary for microtubule nucleation at the centrosome. [UniProt]

Research Area Controls and Markers antibody; Signaling Transduction antibody

Calculated Mw 103 kDa
