# ARG65517 anti-CD271 / NGFR p75 antibody [NGFR5] (Biotin)

Package: 50 μg Store at: 4°C

#### **Summary**

Product Description Biotin-conjugated Mouse Monoclonal antibody [NGFR5] recognizes CD271 / NGFR p75

Tested Reactivity Hu, Cat, Frt, NHuPrm, Rb

Species Does Not React With Ms, Rat

Tested Application FACS, ICC/IF, IHC-P, WB

Specificity The mouse monoclonal antibody NGFR5 (originally C34C) recognizes CD271 / NGFR, a 75 kDa

transmembrane glycoprotein of the TNFR superfamily. The epitope is localized within amino acids 1 -

160.

Host Mouse

**Clonality** Monoclonal

Clone NGFR5
Isotype IgG1

Target Name CD271 / NGFR p75

Species Human

**Immunogen** Purified CD271 protein isolated from human melanoma cell line A875

Conjugation Biotin

Alternate Names Gp80-LNGFR; CD271; CD antigen CD271; p75 ICD; Tumor necrosis factor receptor superfamily member

16; p75NTR; NGF receptor; TNFRSF16; p75(NTR); Low affinity neurotrophin receptor p75NTR; Low-

affinity nerve growth factor receptor

### **Application Instructions**

Application table	Application	Dilution
	FACS	1 - 4 μg/ml
	ICC/IF	Assay-dependent
	IHC-P	Assay-dependent
	WB	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

#### **Properties**

Form	Liquid
Purification Note	The purified antibody is conjugated with Biotin-LC-NHS under optimum conditions. The reagent is free of unconjugated biotin.
Buffer	PBS (pH 7.4) and 15 mM Sodium azide

Preservative 15 mM Sodium azide

Concentration 1 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Database links <u>GeneID: 4804 Human</u>

Swiss-port # P08138 Human

Gene Symbol NGFR

Gene Full Name nerve growth factor receptor

Background CD271 / NGFR, also known as p75NGFR or p75NTR, is a 75 kDa low affinity receptor for the NGF (nerve

growth factor), BDNF (brain-derived growth factor), and other neurotrophins, such as NT3 and NT4/5. Unlike other members of the tumor necrosis factor receptor superfamily of transmembrane proteins, CD271 has unique intracellular domain structure (lacks catalytic activity) and downstream signaling partners. Triggered by its ligands CD271 affects growth, differentiation, migration and death of the

nervous system cells.

Function Plays a role in the regulation of the translocation of GLUT4 to the cell surface in adipocytes and skeletal

muscle cells in response to insulin, probably by regulating RAB31 activity, and thereby contributes to the regulation of insulin-dependent glucose uptake (By similarity). Low affinity receptor which can bind to NGF, BDNF, NT-3, and NT-4. Can mediate cell survival as well as cell death of neural cells. Necessary

for the circadian oscillation of the clock genes ARNTL/BMAL1, PER1, PER2 and NR1D1 in the

 $suprachias matic \ nucleus \ (SCN) \ of the \ brain \ and \ in \ liver \ and \ of the \ genes \ involved \ in \ glucose \ and \ lipid$ 

metabolism in the liver. [UniProt]

Research Area Developmental Biology antibody; Neuroscience antibody

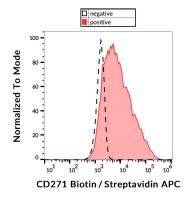

Calculated Mw 45 kDa

PTM N- and O-glycosylated.

O-linked glycans consist of Gal(1-3)GalNAc core elongated by 1 or 2 NeuNAc.

Phosphorylated on serine residues.
