# ARG66804 anti-Cyclin D1 antibody [SQab20217]

Package: 100 μl Store at: -20°C

## **Summary**

**Product Description** Recombinant Rabbit Monoclonal antibody [SQab20217] recognizes Cyclin D1

**Tested Reactivity** Hu

**Tested Application** IHC-P, WB Host Rabbit

Clonality Monoclonal SQab20217 Clone

Isotype IgG

**Target Name** Cyclin D1 **Species** Human

Immunogen Synthetic peptide within aa. 200-295 of Human Cyclin D1.

Conjugation Un-conjugated

B-cell lymphoma 1 protein; PRAD1; U21B31; D11S287E; BCL-1; G1/S-specific cyclin-D1; BCL-1 oncogene; **Alternate Names** 

BCL1; PRAD1 oncogene

## **Application Instructions**

HC-P 1:100 - 1:200  WB 1:500 - 1:2000  Application Note IHC-P: Antigen Retrieval: Heat mediation was performed in Tris/EDTA buffer (pH 9.0), primary antibody incubate at RT (18°C - 25°C) for 30 minutes.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.  Positive Control HCT116; Human colon cancer tissue; Human mantle cell lymphoma  Observed Size ~ 34 kDa	Application table	Application	Dilution
Application Note  IHC-P: Antigen Retrieval: Heat mediation was performed in Tris/EDTA buffer (pH 9.0), primary antibody incubate at RT (18°C - 25°C) for 30 minutes.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.  Positive Control  HCT116; Human colon cancer tissue; Human mantle cell lymphoma		IHC-P	1:100 - 1:200
incubate at RT (18°C - 25°C) for 30 minutes.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.  Positive Control  HCT116; Human colon cancer tissue; Human mantle cell lymphoma		WB	1:500 - 1:2000
	Application Note	incubate at RT (18°C - 25°C) for 30 minutes.  * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations	
Observed Size ~ 34 kDa	Positive Control	HCT116; Human colon cancer tissue; Human mantle cell lymphoma	
	Observed Size	~ 34 kDa	

#### **Properties**

Form Liquid Purification Purification with Protein A. PBS, 0.01% Sodium azide, 40% Glycerol and 0.05% BSA. **Buffer** 0.01% Sodium azide Preservative

Stabilizer 40% Glycerol and 0.05% BSA

For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot Storage instruction and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw

Note

For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Gene Symbol

CCND1

Gene Full Name

cyclin D1

Background

The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance throughout the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each mitotic event. This cyclin forms a complex with and functions as a regulatory subunit of CDK4 or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown to interact with tumor suppressor protein Rb and the expression of this gene is regulated positively by Rb. Mutations, amplification and overexpression of this gene, which alters cell cycle progression, are observed frequently in a variety of human cancers. [provided by RefSeq, Dec 2019]

**Function** 

Regulatory component of the cyclin D1-CDK4 (DC) complex that phosphorylates and inhibits members of the retinoblastoma (RB) protein family including RB1 and regulates the cell-cycle during G(1)/S transition. Phosphorylation of RB1 allows dissociation of the transcription factor E2F from the RB/E2F complex and the subsequent transcription of E2F target genes which are responsible for the progression through the G(1) phase. Hypophosphorylates RB1 in early G(1) phase. Cyclin D-CDK4 complexes are major integrators of various mitogenenic and antimitogenic signals. Also substrate for SMAD3, phosphorylating SMAD3 in a cell-cycle-dependent manner and repressing its transcriptional activity. Component of the ternary complex, cyclin D1/CDK4/CDKN1B, required for nuclear translocation and activity of the cyclin D-CDK4 complex. Exhibits transcriptional corepressor activity with INSM1 on the NEUROD1 and INS promoters in a cell cycle-independent manner. [UniProt]

Calculated Mw

34 kDa

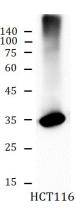

PTM

Phosphorylation at Thr-286 by MAP kinases is required for ubiquitination and degradation following DNA damage. It probably plays an essential role for recognition by the FBXO31 component of SCF (SKP1-cullin-F-box) protein ligase complex.

Ubiquitinated, primarily as 'Lys-48'-linked polyubiquitination. Ubiquitinated by a SCF (SKP1-CUL1-F-box protein) ubiquitin-protein ligase complex containing FBXO4 and CRYAB. Following DNA damage it is ubiquitinated by some SCF (SKP1-cullin-F-box) protein ligase complex containing FBXO31. SCF-type ubiquitination is dependent on Thr-286 phosphorylation (By similarity). Ubiquitinated also by UHRF2 apparently in a phosphorylation-independent manner. Ubiquitination leads to its degradation and G1 arrest. Deubiquitinated by USP2; leading to its stabilization. [UniProt]

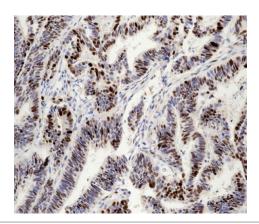

Cellular Localization

Nucleus. Cytoplasm. Membrane. Note=Cyclin D-CDK4 complexes accumulate at the nuclear membrane and are then translocated to the nucleus through interaction with KIP/CIP family members. [UniProt]

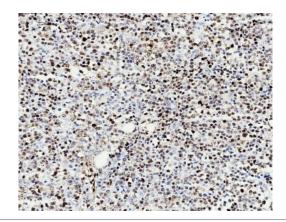

# ARG66804 anti-Cyclin D1 antibody [SQab20217] WB image (Customer's Feedback)

Western blot: HCT116 cell lysate stained with ARG66804 anti-Cyclin D1 antibody [SQab20217] at 1:1000 dilution.

#### ARG66804 anti-Cyclin D1 antibody [SQab20217] IHC-P image

Immunohistochemistry: Formalin/PFA-fixed and paraffin-embedded Human colon cancer tissue. Antigen Retrieval: Heat mediation was performed in Tris/EDTA buffer (pH 9.0). The tissue section was stained with ARG66804 anti-Cyclin D1 antibody [SQab20217].

### ARG66804 anti-Cyclin D1 antibody [SQab20217] IHC-P image

Immunohistochemistry: Formalin/PFA-fixed and paraffin-embedded Human mantle cell lymphoma. Antigen Retrieval: Heat mediation was performed in Tris/EDTA buffer (pH 9.0). The tissue section was stained with ARG66804 anti-Cyclin D1 antibody [SQab20217].
