

## ARG81342 Mouse CD279 / PD-1 ELISA Kit

Package: 96 wells  
Store at: 4°C

### Component

Cat. No.	Component Name	Package	Temp
ARG81342-001	Antibody-coated microplate	8 X 12 strips	4°C. Unused strips should be sealed tightly in the air-tight pouch.
ARG81342-002	Standard (Lyophilized)	2 X 1.6 ng/vial	4°C
ARG81342-003	Standard diluent buffer	20 ml	4°C
ARG81342-004	Antibody conjugate concentrate	400 µl	4°C
ARG81342-005	Antibody diluent buffer	16 ml	4°C
ARG81342-006	HRP-Streptavidin concentrate	400 µl	4°C (Protect from light)
ARG81342-007	HRP-Streptavidin diluent buffer	16 ml	4°C
ARG81342-008	20X Wash buffer	50 ml	4°C
ARG81342-009	TMB substrate	12 ml	4°C (Protect from light)
ARG81342-010	STOP solution	12 ml	4°C
ARG81342-011	Plate sealer	4 strips	Room temperature

### Summary

Product Description	ARG81342 Mouse CD279 / PD-1 ELISA Kit is an Enzyme Immunoassay kit for the quantification of Mouse CD279 / PD-1 in serum, plasma and cell culture supernatant.
Tested Reactivity	Ms
Tested Application	ELISA
Target Name	CD279 / PD-1
Conjugation	HRP
Conjugation Note	Substrate: TMB and read at 450 nm.
Sensitivity	7.8 pg/ml
Sample Type	Serum, plasma and cell culture supernatant.
Standard Range	15.6 - 1000 pg/ml
Sample Volume	100 µl
Precision	CV: less than 10%

**Alternate Names** hPD-I; CD279; PD-1; Protein PD-1; CD antigen CD279; PD1; hSLE1; SLEB2; Programmed cell death protein 1; hPD-1

## Application Instructions

---

**Assay Time** ~ 3.5 hours

## Properties

---

**Form** 96 well

**Storage instruction** Store the kit at 2-8°C. Keep microplate wells sealed in a dry bag with desiccants. Do not expose test reagents to heat, sun or strong light during storage and usage. Please refer to the product user manual for detail temperatures of the components.

**Note** For laboratory research only, not for drug, diagnostic or other use.

## Bioinformation

---

**Gene Symbol** PDCD1

**Gene Full Name** programmed cell death 1

**Background** CD279 / PD-1 is a cell surface membrane protein of the immunoglobulin superfamily. This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases. [provided by RefSeq, Jul 2008]

**Function** CD279 / PD-1 is an inhibitory receptor on antigen activated T-cells. It plays a critical role in induction and maintenance of immune tolerance to self (PubMed:21276005). Delivers inhibitory signals upon binding to ligands CD274/PDCD1L1 and CD273/PDCD1LG2 (PubMed:21276005). Following T-cell receptor (TCR) engagement, PDCD1 associates with CD3-TCR in the immunological synapse and directly inhibits T-cell activation. Suppresses T-cell activation through the recruitment of PTPN11/SHP-2: following ligand-binding, PDCD1 is phosphorylated within the ITSM motif, leading to the recruitment of the protein tyrosine phosphatase PTPN11/SHP-2 that mediates dephosphorylation of key TCR proximal signaling molecules, such as ZAP70, PRKCQ/PKCtheta and CD247/CD3zeta.

The PDCD1-mediated inhibitory pathway is exploited by tumors to attenuate anti-tumor immunity and escape destruction by the immune system, thereby facilitating tumor survival (PubMed:28951311). The interaction with CD274/PDCD1L1 inhibits cytotoxic T lymphocytes (CTLs) effector function (PubMed:28951311). The blockage of the PDCD1-mediated pathway results in the reversal of the exhausted T-cell phenotype and the normalization of the anti-tumor response, providing a rationale for cancer immunotherapy (PubMed:22658127, PubMed:25034862, PubMed:25399552). [UniProt]
