Bioinformation

Gene Symbol SPOCK1

Gene Full Name sparco/osteonectin, cwcv and kazal-like domains proteoglycan (testican) 1

Background This gene encodes the protein core of a seminal plasma proteoglycan containing chondroitin- and heparan-sulfate chains. The protein's function is unknown, although similarity to thyropan-type cysteine protease-inhibitors suggests its function may be related to protease inhibition. [provided by RefSeq, Jul 2008]

Function May play a role in cell-cell and cell-matrix interactions. May contribute to various neuronal mechanisms in the central nervous system. [UniProt]
